A new event bringing the industry together

In anticipation of ELFAK 2023, we are now organising ELFAK: TA – a completely new event that was both initiated by, and created together with, the industry. We'll see you at the Swedish Exhibition & Congress Centre in Gothenburg where the focus will be on education, skills and social activities.

THE INDUSTRY GATHERS

We know that the entire electricity industry is looking forward to doing business, exchanging experiences and meeting customers and colleagues again. Not to mention experiencing new technology, getting ideas for new solutions and being inspired by exciting innovations. A pandemic does not stop the power of change; on the contrary, it accelerates the pace of change!

THEME OF THE YEAR

ELFAK: TA offers both an extensive theatre programme and many opportunities for training and certification. We are creating content around our themes of Electrification, Digitalisation and Circular Societies – in close collaboration with the industry, which makes the programme highly relevant to visitors.

SHARE YOUR KNOWLEDGE

By taking part in the exhibition, you'll meet both new and existing customers and make valuable contacts. Just as you have missed meeting with customers, they long to discover new products and services – and to meet your experts! As an exhibitor, you also have the opportunity to give a 20-minute presentation on the open stages where you can share case studies and new knowledge.

THE EVENT OFFERS

- Several open stages with exciting content programmes.
- Experts and qualified lecturers on site.
- Training and opportunities for certification.
- Exhibition of products, systems and services.
- Social activities such as informal get-togethers and after-work drinks.

FACTS ABOUT ELFAK:TA

- A national event
- Lasting for 1.5 days
- About 150 exhibitors on site
- The same target group as ELFAK
